Who is ASENT?

The American Society for Experimental NeuroTherapeutics (ASENT) is a leading independent non-profit organization established in 1997 by a consortium of leaders in academia, government, advocacy and the neurotherapeutic industry. Its primary goal is to encourage and advance the development of improved therapies for diseases and disorders of the nervous system.

ASENT promotes scientific exchanges to encourage interaction between those involved in the discovery and development of neurotherapeutics, as well as to provide opportunities for dialogue between the interested groups.

ASENT's Mission

The mission of the American Society for Experimental NeuroTherapeutics is to:

- Provide a forum for broadly defined interests of academia, government, advocacy and the industry, who are concerned with the field of neurotherapeutics;
- Promote dialogue, understanding, and cooperation among the interested groups;
- Develop information and seek consensus on matters germane to the organization's mission; and
- Organize education and training for healthcare practitioners, biomedical scientists, and officials participating in the neurotherapeutic field.

"I have been a member of ASENT for six years and find it to be an incredibly valuable experience. Through membership in ASENT, I have been able to network with key leaders in the neurotherapeutics field. I really enjoy participating actively on committees and attending the annual meeting every year!"

Rohit Bakshi, MD, FANN

Why should I join ASENT? ►

The American Society for Experimental Neurotherapeutics is the country's most prominent non-profit organization that promotes scientific exchanges to encourage contacts between those involved in the discovery and development of neurotherapeutics and to provide opportunities for dialogue between the interested parties. Headquartered in West Hartford, CT, ASENT has more than 300 active members.

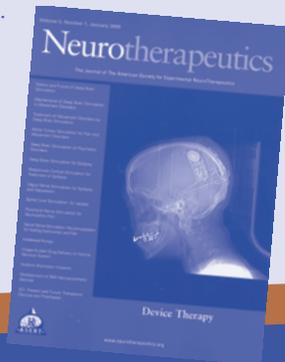

Members of ASENT are eligible for a wealth of features and benefits, including discounts to its annual meeting, a subscription to its accolade winning publication, *Neurotherapeutics*®, and networking opportunities with some of the industry's leading authorities.

ASENT has creatively established four levels of membership to fit the unique needs of neurotherapeutic professionals, trainees, government officials, and advocacy organizations.

Benefits of Membership ►

Membership to ASENT opens the doors to a large selection of unique features and benefits that are not afforded to the general public or non-members. Some key benefits include:

- **Subscription** to the industry's premiere publication, *Neurotherapeutics*®. Started in 2004, over 300 now subscribe to this quarterly journal. Indexed in both Medline and Current Contents, it is available to members either electronically or in print. Each issue of this prestigious journal focuses on critical reviews of topics essential to current and future central nervous system therapeutics. A \$100 value.

- **Full access** to ASENT's password protected members' only online directory, providing valuable networking opportunities as well as access to a wide array of information and resources.
- **Subscription** to ASENT's e-newsletter, with timely and meaningful updates on association happenings, industry trends, government news and scientific reports.
- **Discounted** registration to ASENT's annual meeting.
- **Opportunity** to network and interact with leading industry professionals and authorities, including the FDA, NIH, advocacy groups, pharmaceutical companies, and academicians in the neurotherapy field.

ASENT's Annual Meeting ►

Every year, over 200 professionals attend the American Society for Experimental Neurotherapeutics annual meeting. This multi-day event provides attendees with the most up-to-date information on industry trends, including abstracts and exhibits, allows participants to share best practices, participate in interactive presentations and seminars with some of the world's leading industry experts as speakers, as well as network with others in the field.

Recent topics at this conference have included:

- **Fundamentals of Clinical Trials in Neurotherapeutics**
- **Disease Specific Clinical Trial Think Tanks**
- **Delivery Systems for the Next Generation**
- **Sleep and Neurotherapeutics**
- **Disease-Modifying Treatment Trials in Alzheimer's Disease**

Levels of Membership ►

ASENT has designed four levels of membership, each uniquely designed for different levels of industry participation. All members receive both ASENT's e-newsletter and a subscription to *Neurotherapeutics*®.

REGULAR MEMBER

Open to professionals who demonstrate an interest in the field of neurotherapeutics. Benefits of this membership include participation at all ASENT scientific meetings with a 30% discounted registration rate, the opportunity to serve on committees, vote, and hold office.

Annual membership: \$250

TRAINEE MEMBER

Open to physicians in training, doctoral candidates, and post-doctoral fellows who are receiving training and experience, or competence in, neurological therapeutics. Trainee members may advance to full membership upon completion of training. Trainee members may also participate in ASENT functions at a reduced rate.

Annual membership: \$100

GOVERNMENT MEMBER

Open to professionals who are employed full-time by a US government agency or office who demonstrate an interest in the field of neurotherapeutics. Government members receive the same benefits and privileges as Regular members.

Annual membership: \$50

ADVOCACY MEMBER

Open to professionals who are employed full-time by a patient advocacy organization who demonstrate an interest in the field of neurotherapeutics. Advocacy members receive the same benefits of membership as Regular members.

Annual membership: \$125
